**UPPER CONNECTICUT VALLEY
MENTAL HEALTH SERVICE, INC.**

**REPORT OF SERVICES RENDERED IN THE
TOWN OF STEWARTSTOWN**

Over the past three years, Upper Connecticut Valley Mental Health Service, Inc. has provided a wide range of services to the people of our valley towns. Overall community response to the agency has increased and we have an average of 16 new admissions each month. Counseling, school consultations, and treatment programs are being maintained, and have been of benefit to 33 individuals and their families in Stewartstown.

Mental health staff members work with school personnel in developing flexible programs for assisting students with problems. Working jointly with parents, teachers, and other helping people, such as the school nurse, students are offered counseling, as well as psychological evaluations in appropriate cases.

Again this year, admissions of area residents to New Hampshire Hospital have been minimal, and those returning to the community have been able to remain at home through the availability of local care.

Upper Connecticut Valley Mental Health Service is near the people it is meant to serve. Our Office is open 9 to 5, with evening appointments available if that is the only time a client can be seen. Staff is available through the hospital switchboard for psychiatric emergencies. Since the agency is locally based, people can get help quickly, with the result that very few residents need leave the area for assistance.

Stewartstown's contribution to Upper Connecticut Valley Mental Health Service is important to our continued service. Contributions help in obtaining matching funds from State and other sources, and it helps us provide staff for help when it is needed. Costs are kept low as possible without impairing the quality of care. Per capita costs for our area are far below those of other rural mental health programs.

Upper Connecticut Valley Mental Health Service meets all State and professional standards for such programs, and is a full member of the New Hampshire Association of Community Mental Health Agencies.

Our staff is prepared to respond to your requests.

SUPERINTENDENT'S REPORT

Teachers, pupils and supportive staff in the schools of Supervisory Union #7 are to be commended for the response and effort made in adapting to the energy shortage. As a result of the efforts made, a savings in heating fuel of approximately 7,000 gallons has been realized to date within the Supervisory Union #7 schools and the use of electrical energy has been noticeably reduced. Consequently, schools were able to remain open during a critical time of concern, namely, the last week in January and the first week in February.

Considerable review is now being given to the school calendar by the State Board of Education in light of the present energy situation. Whether there will be a change in school calendars regarding traditional starting dates and vacations will be dependent upon the anticipated availability of fuel and energy.

Rising costs have had their effect on local school district budgets also and noticeable increases are apparent in instructional materials, heating fuel, utilities and transportation. To add to the dilemma, there are indications that some school supplies may not be readily available. It is expected, however, that satisfactory adjustments can be made within each school without curtailing basic educational programs.

Supervisory Union #7 is indeed proud that one of its teachers, Mr. David Killam of the Colebrook School District, was chosen as the N. H. Outstanding Teacher of the Year for 1973. It is always pleasing to see dedication and hard work receive public recognition and it is hoped that the trend will continue in recognizing the many dedicated teachers within our local school system.

A major concern for the local education scene are the additional programs of instruction now required by statute. Instruction in nutrition and venereal disease along with past programs of instruction on drugs and alcohol are now mandated by law. These are certainly vital areas of social concern and do require attention by local citizens. It is becoming apparent, however, that schools are increasingly being called upon to correct social ills along with providing the primary function of educating youngsters in the basic skills of learning. Additional programs implemented into the normal school day, often at additional local costs, cannot help but take time away from other areas of study. Should the trend continue a change in the school calendar year or the length of the school day will certainly have to take place if priorities in teaching basic skills are not to be sacrificed.

The local staff development committee comprised of teachers, parents, pupils, and school administrators is to be commended for the excellent work it has conducted this school year. Although the response to questionnaires sent out to the public by this committee has in some instances been rather disappointing, sufficient

information has been obtained to help the committee progress in its goal of developing a staff development program. The giving of their time and effort is certainly appreciated by all concerned in improving the educational program.

GUIDANCE COUNSELOR'S REPORT

People sometimes ask me, "What does a Guidance Counselor do?" The same question, I am sure, is on the minds of many who do not ask. Toward the goal of a better understanding of a counselor's work, I am presenting a twofold explanation of my work by way of this report. First, a general statement of what the job encompasses. Secondly, a general statement of a particular phase of the work followed by a specific example.

The job of Guidance Counselor essentially is to know each student; to help each student know himself both as an individual and as a member of society, to make each student aware of his strengths and limitations, and to help him use this knowledge to satisfy his immediate needs and to plan his future. Guidance is a never ending job entailing a great deal of work on a one-to-one basis with each student. While group work is used upon occasion, the real success of a counselor's work hinges on a favorable, personal counselor—student relationship. During the summer and the time since school commenced in the fall, I have been involved in over 400 of these individual conferences.

In order to fulfill the job adequately, a counselor must accumulate information concerning each student's mental and physical abilities, aptitudes, attitudes, achievements, interests and personality. Information gathered last year has been added to the files of each student in the three upper classes of Pittsburg High School and Colebrook Academy. Files have been started for all new students and Freshmen.

The counselor must be sure that information concerning post-high school education and career possibilities is available for students. During the summer and fall, a great deal of new material is received, reviewed and exposed in the new Guidance Room made available to me at Colebrook Academy. The room is by no means complete yet but it will serve as a resource center for any student wishing to investigate either further education or careers. I hope that you will visit the Guidance Office in Room 26 at Colebrook Academy in the near future. Materials for Pittsburg and Stewartstown students have to be carried with me and be given as much exposure as possible.

The counselor must work with each secondary student in scheduling courses of study and with drop-outs or graduates on investigating educational or job placement plans which they may have. There are better than 300 secondary students in the

two schools and the number of graduates seeking counseling is steadily increasing. I make every attempt to check on drop-outs but this is a very difficult and time consuming job.

Time must also be reserved for the student who has a problem and wants to talk about it. Also, the student who is a problem and should talk about it. I do not have an accurate count of the number of individual cases of this type but considerable time is taken up in this manner.

Finally, the counselor must find time for a follow up of graduates. This has been done in the case of better than 75% of last year's graduates.

If the counselor is to carry out all of the above effectively, he should also find time and ways of obtaining desirable relations with teachers and parents for these are people without whose cooperation few guidance programs would succeed. I have already met with the Pittsburg teachers in regard to the guidance program and them and vice-versa. I hope to do this in the immediate future with the Colebrook and Stewartstown teachers.

I hope that this report will give you some idea of the type and amount of work involved in counseling. At the same time I would hope that you would realize that there is much that has not been discussed in this report. With approximately 540 students in grades 7 through 12 spread over the 5 districts of this union, there seems to be enough to keep one counselor busy!

I enjoy the work and like to feel that a little good is accomplished each day.

JOHN M. SHIELDS
Guidance Counselor

SCHOOL HEALTH

Professional nursing service in the school setting is provided to strengthen the educational process of students by promoting and maintaining good health. It is believed that only through the active and sincere efforts of school, home and community can health be promoted, knowledge be extended, and attitudes and behavior of all students be positively directed. These are our goals.

Two health aides have been added to the health program as additional supportive personnel. They are Mrs. Mable Hunter (Pittsburg) and Mrs. Carolyn Hughes (Stewartstown and Colebrook).

This year the following services were performed: Checking heights and weights and teeth, testing vision and hearing, physical examinations for students in grades 4, 8, 11 and those participating in athletic sports as well as those absent last year and first graders who missed preschool physicals, T. B. Skin tests for all personnel in the union and first graders who needed them, immunizations as needed, preschool clinics which include immunizations, physicals, T. B. and urine tests, home visits, phone calls and letter contacts for follow-through health care as deemed necessary, promotion of good mental health with the assistance of the Upper Connecticut Valley Mental Health Services, first aid and emergency care, health teaching and counseling, and continuous supervision of general health.

It is hoped that by 1974-75 there will be provisions for a school physician to provide the professional medical advice and care required to maintain optimum health services for the school child. Also, the school boards have been urged to form a school health council composed of persons who are highly qualified in the health field and those with sincere interest and concern for our youth. First, this would give the school authorities a resource for guidance on perplexing health problems including adoption of health policies and secondly, we would have a segment of the communities actively supporting the school health program.

The Matching Dental Fund Program sponsored by state and local monies was again utilized this year, providing many students with much needed dental care.

The American Cancer Society provided films and literature for all junior and senior girls and mothers for early detection and treatment of cancer. Dr. Marjorie Parsons volunteered her services for a discussion period following the presentation of films.

There was a preschool hearing and vision clinic in May sponsored by the N. H. Division of Public Health for early detection

of defects.

Many deserving students received eye examinations and/or glasses provided by the Sight Conservation Program presented by the State of N. H.

Services of an audiologist, Andrew Brandon, from the Portsmouth Rehabilitation Center is available to our area by way of a mobile unit for evaluation of students failing hearing tests. There is a charge of \$7 for each child examined.

Several youngsters attended the Orthopedic Clinic for evaluation and treatment in May at our local hospital sponsored by Crippled Childrens Services.

The fourth grade students participated in a classroom dental prevention program initiated by the Bureau of Dental Health. They brushed and flossed daily in school with weekly detection of plaque by use of food coloring tablets under the direct supervision of their classroom teacher. The objectives of the program were to eliminate dental plaque, help the student develop daily habits necessary for effective oral hygiene and thereby reduce dental diseases.

North Country Education Services again provided speech therapy for all students in the union requiring help.

As a reminder to all parents of children entering first grade, the State Department of Education requires each youngster to meet the following requirements prior to school entry:

1. Physical examination
2. T. B. Test within one year
3. Complete Diptheria, Pertussis, and Tetanus Vaccine series (five in all)
4. Complete oral Polio Vaccine series (consisting of five)
5. Rubella Vaccine (German Measles)
6. Rubeola Vaccine (Measles)

All parents are urged to take advantage of the preschool clinics available in their area to prepare their youngsters for meeting the above requirements for entering school.

Each year we strive to improve the health program in our schools. With everyone working together, it is hoped that we can achieve our goal in this endeavor.
